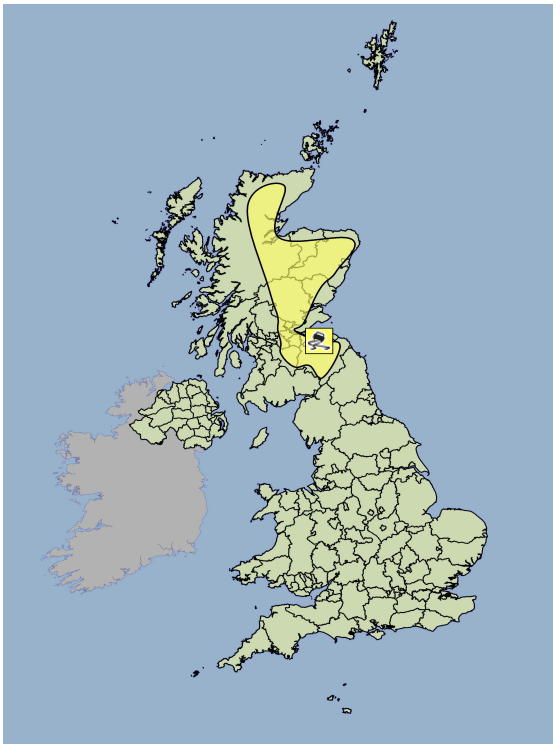
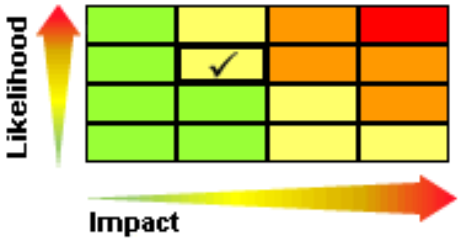
National Severe Weather Warning Service





Chief Forecasters Assessment
A band of rain will clear east into the North Sea during Saturday evening. Clearing skies will allow temperatures to fall with ice readily forming on untreated surfaces overnight into Sunday morning. Some showers are also expected, and could give a few cm mainly above 300 m, and adding to the ice risk. Temperatures will then start to recover from the southwest early on Sunday morning as cloud thickens and winds increase.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **00:05 on Sun, 07th Feb 2016** until **09:00 on Sun, 07th Feb 2016**

Icy stretches are expected to form on untreated surfaces overnight into Sunday morning. Further showers are also expected in the west, these turning to snow on higher ground. Please be aware of these wintry hazards and the potential for some difficult driving conditions.
